NATIONAL GREEN TECHNOLOGY POLICY LAUNCHED

At the launching of the National Green Technology Policy on 24th July 2009, the Prime Minister Datuk Seri Najib Razak mentioned "It is my dream that one day we can live in a clean, healthy and high quality environment, where cities, townships and communities are built on the fundamentals of Green Technology". MyWP shares this dream and hope that every citizen will eventu-

ally embrace this spirit, understands and applies the fundamentals of Green Technology in daily actions to leave high quality environment for the next generation. Policies in any sector should factor in costs to the environment such as pollution, erosion and loss of biodiversity.

The Prime Minister, Dato' Seri Najib Razak, accompanied by Datuk Peter Chin, Minister of KeTTHA.

ANALYSIS OF SUSTAINABLE WATER RESOURCES USAGE

A discussion between representatives from FAO, MANCID and top management of MUDA Agricultural Development Authority (MADA) at MADA office on 28 July 2009.

Malaysian National Committee on Irrigation and Drainage (MANCID) in collaboration with Food and Agriculture Organisation (FAO) is conducting a Project study on Analysis of Sustainable Water

Resources Usage. Malaysia was selected as one of four (4) countries; other than China, Vietnam and Thailand to participate in this project study. Muda and Kedah Basin were identified as study area and the implementation starts from 2008 and to be complete by years 2011. The objective of the project is to develop capacity in the region through establishment of knowledge network on water allocation and center of excellence. An initial discussion attended by FAO, MANCID, Malaysian Water Partnership (MyWP) and other agency representatives was held at Pullman Hotel, Putrajaya on 29 July 2009. MANCID wants to thank Dato' Ir. Syed Muhammad Shahabudin, Chairperson of MyWP for promising strong support in this project ■
